NEW :

Hi Definition CCTV Technology

NOW HD CCTV IN AN ANALOGUE FORMAT

For many years, CCTV images didn't really provide much picture quality. Plenty money needed to be spent on IP products in order to achieve usable results.

Now things have changed!

Now you can achieve HD images using analogue equipment, installed over coaxial cable. You can now retrofit HD cameras to a legacy cable network and achieve amazing HD results.

Using this new technology, you can now provide Hybrid solutions for your client, combining existing Analogue and NEW HD cameras on a single Hybrid DVR.

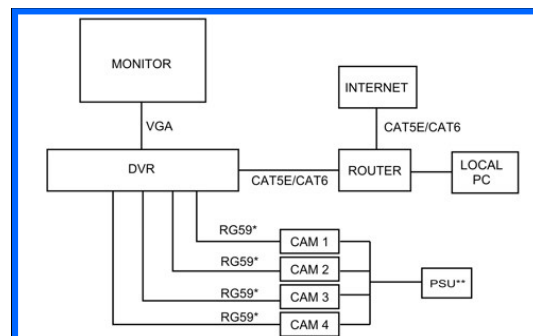

These new DVRs can now display multiple resolution scenes at the same time.

AHD ADVANTAGE

Type	AHD
NTSC/PAL	Support
960H/D1	Support
ISP/TX combination	Support
HD resolution	720P@25/30 720P@50/60 1080P@25/30
Transmission distance (75-3 coaxial@720P)	500M
Audio	Support
Coaxial transmission control signal	Support
Analog matrix	Support
Analog video distributor	Support
3rd party standard	Yes

ADVANTAGES

- Use existing cable network
- HD images
- Combines with SD legacy cameras when used on a Hybrid DVR
- Progressive-Scan HD analogue video images
- Longer transmit distance without any signal loss.

Easiest Upgrade from Analog 700TVL to HD 1080

720P AHD Camera

Coaxial Video Cable 300-500M Distance

Existing wiring can be kept using
