Projection Screens

 **Simply Sensational**
Making Home Theater an Occasion 

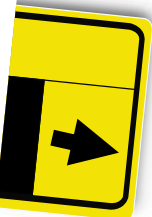

Simply Sensational Images

Verdant has been designing, manufacturing and marketing a professional line of projection screens for use in the best home theaters, control rooms, classrooms and boardrooms.

Our selection of projection screen fabrics and materials is industry unique allowing us to provide durable projection screens delivering deep colour and detailed, non-glare images.

For project design support, email sales@cvplus.com.au

Designed for up to 1080p projectors, Verdant screens can be used for professional and high-performance home video applications.

Custom constructed models including large, low-gain models that can be used for large rooms that require wide viewing angles with complete image uniformity, are also available.
